

# New Dosimeter Packaging

Your dosimeters will now arrive in new packaging. There are two big changes you will notice which are detailed below. If you have any questions, please contact Connie Turnbough at 314-362-3475.

## Redesigned Packaging

Currently, your dosimeters are packaged in cellophane that includes a paper communicator card. The redesigned packaging will include up to 10 dosimeters in a single plastic bag. Participant names and details concerning the contents are clearly printed on the back of the bag for quick identification.

## Tab on dosimeter must be removed before placing dosimeter into gray holder.

A newly designed tab, molded into the dosimeter itself, breaks away before being placed into the dosimeter clip for use. Dosimeters with the "REMOVE" tab still intact will be considered unused.
