

**REQUEST FOR MODIFICATION OF POSTED
RADIATION CAUTION SIGNS**

AUTHORIZED USER: _____

AUTHORIZED USER NUMBER: _____

LABORATORY LOCATION (S): _____

The location(s) listed above, posted with a “Caution Radioactive Materials” sign, is/are never used for the storage of radioactive materials in quantities that require security during non-working hours, unless the materials are secured in a locked container within the room. Accordingly, it is requested that the posted radiation warning sign(s) be modified with the extra wording “off hours security not required” in order to eliminate the needless locking of the room. I understand that it is my research group’s responsibility to notify Radiation Safety @ 362-3476, if the situation changes.
